

MARCH 2020

# Workforce Training: Environment of Care & Safety

PROPOSED BY

GLOBAL TRAINING INSTITUTE

PROPOSED TO

Central Mississippi Planning & Development District

# PROJECT PROPOSAL

## OUR COMPANY

Having trained thousands of healthcare professionals across the United States, we have become a training destination for military and civilian healthcare providers all over the nation. We boast expert faculty representing multiple facets of healthcare and work environments. Our facility is one of the largest training and simulation laboratories in the Southeastern U.S. Over 4,500 healthcare providers have participated in our training programs, improving outcomes for the warfighters and patients they serve.

As demands increase, our team responded by creating a Learning Management System, GTI Academy, which provides remote and on-demand courses. As a result, more professionals will have access to our world-class curricula.

## TARGET AUDIENCE

As the workforce demand increases and more people are hired, the need for standardized training in safety and health in the workplace increases. Both high-school graduate-level and professionally educated employees require this essential core training for safe environments.

## COURSE CURRICULA

- Handwashing Safety & Standards
- How Viruses & Microbes Travel in Workplace
- Preventing Viral Transmission in Workplace
- Social Distancing: Etiquette in Workplace
- Proper Cleaning Solutions & Techniques
- Situational Awareness: Protecting Yourself in Dangerous Civil Environments

\*\*\* Based on COVID-19 OSHA Guidelines, March 23, 2020\*\*\*
